

Does your organisation need a Virtual DBA?

Like most organisations your databases are the centre of your information systems. But like most organisations you are faced with the following challenge:

How can we cost effectively monitor and ensure the availability of our databases?

Virtual DBA is a remote database administration service designed by WARDY IT Solutions to assist your organisation with the management of Microsoft SQL Server.

Our *Virtual DBA* service provides a cost effective solution to meet the day-to-day challenges of availability, performance and administration of your organisations critical Microsoft SQL Server databases.

A *Virtual DBA* remotely monitors your SQL Server databases on a daily basis and reports any issues along with the impact that these issues may have on your SQL Server databases and how these issues can be addressed.

The *Virtual DBA* service also provides your organisation with priority access to a team of Database Administrators on call 24x7. So, if your organisation requires incident support or just someone to provide you with advice, there is also a Database Administrator available that not only knows your systems but also understands your organisation.

Virtual DBA is a solution that can be tailored to the needs of your organisation whether it be to assist your existing staff or to outsource all of your Microsoft SQL Server database management. So why not find out more about the benefits of a *Virtual DBA*?

Looking for a better way to manage your Microsoft SQL Server Databases?

Contact us today to find out how a *Virtual DBA* can assist your organisation.
