

Implementing a SQL Data Warehouse

This 5-day instructor led course describes how to implement a data warehouse platform to support a BI solution.

Participants will learn how to create a data warehouse with Microsoft® SQL Server® 2016 and with Azure SQL Data Warehouse, to implement ETL with SQL Server Integration Services, and to validate and cleanse data with SQL Server Data Quality Services and SQL Server Master Data Services.

Who Should Attend:

This course is intended for individuals who:

- Are a database professionals who need to fulfil a BI Developer role
- Need to focus on hands-on work creating BI solutions including Data Warehouse implementation, ETL & data cleansing

Course Prerequisites:

Before attending this course, participants must have, at least 2 years' experience working with relational databases including:

- Designing a normalized database
- Creating tables and relationships
- Querying with Transact-SQL
- Some exposure to basic programming constructs (such as looping and branching)
- An awareness of key business priorities such as revenue, profitability, & financial accounting is desirable

Course Objectives:

After completing this course, participants will be able to:

- Describe the key elements of a data warehousing solution
- Describe the main hardware considerations for building a data warehouse
- Implement a logical & physical design for a data warehouse
- Create columnstore indexes
- Implementing an Azure SQL Data Warehouse
- Describe the key features of SSIS
- Implement a data flow by using SSIS
- Implement control flow by using tasks and precedence constraints
- Create dynamic packages that include variables and parameters
- Debug SSIS packages
- Describe the considerations for implement an ETL solution
- Implement Data Quality Services
- Implement a Master Data Services model
- Describe how you can use custom components to extend SSIS
- Deploy SSIS projects
- Describe BI and common BI scenarios

Course Code: 20767A

Course Duration: 5 Days

Course Summary

Module 1: Introduction to Data Warehousing

Module 2: Planning Data Warehouse Infrastructure

Module 3: Designing & Implementing a Data Warehouse

Module 4: Columnstore Indexes

Module 5: Implementing an Azure SQL Data Warehouse

Module 6: Creating an ETL Solution

Module 7: Implementing Control Flow in an SSIS Package

Module 8: Debugging and Troubleshooting SSIS Packages

Module 9: Implementing an Incremental ETL Process

Module 10: Enforcing Data Quality

Module 11: Using Master Data Services

Module 12: Extending SQL Server Integration Services (SSIS)

Module 13: Deploying and Configuring SSIS Packages

Module 14: Consuming Data in a Data Warehouse

Microsoft Partner

Gold Data Analytics
Gold Data Platform
Silver Learning

Course Outline

Module 1: Introduction to Data Warehousing

This module describes data warehouse concepts and architecture considerations

Lessons

- Overview of Data Warehousing
- Considerations for a Data Warehouse Solution

Lab

- Exploring a Data Warehouse Solution

Module 2: Planning Data Warehouse Infrastructure

This module describes the main hardware considerations for building a data warehouse

Lessons

- Considerations for Building a Data Warehouse
- Data Warehouse Reference Architectures and Appliances

Lab

- Planning Data Warehouse Infrastructure

Module 3: Designing and Implementing a Data Warehouse

This module describes how you go about designing and implementing a schema for a data warehouse

Lessons

- Logical Design for a Data Warehouse
- Physical Design for a Data Warehouse

Lab

- Implementing a Data Warehouse Schema

Module 4: Columnstore Indexes

This module introduces Columnstore Indexes

Lessons

- Introduction to Columnstore Indexes
- Creating Columnstore Indexes
- Working with Columnstore Indexes

Lab

- Using Columnstore Indexes

Module 5: Implementing an Azure SQL Data Warehouse

This module describes Azure SQL Data Warehouses and how to implement them.

Lessons

- Advantages of Azure SQL Data Warehouse
- Implementing an Azure SQL Data Warehouse
- Developing an Azure SQL Data Warehouse
- Migrating to an Azure SQ Data Warehouse

Lab

- Implementing an Azure SQL Data Warehouse

Module 6: Creating an ETL Solution

At the end of this module you will be able to implement data flow in a SSIS package

Lessons

- Introduction to ETL with SSIS
- Exploring Source Data
- Implementing Data Flow

Lab

- Implementing Data Flow in an SSIS Package

Module 7: Implementing Control Flow in an SSIS Package

This module describes implementing control flow in an SSIS package

Lessons

- Introduction to Control Flow
- Creating Dynamic Packages
- Using Containers

Lab

- Implementing Control Flow in an SSIS Package
- Using Transactions and Checkpoints

Module 8: Debugging and Troubleshooting SSIS Packages

This module describes how to debug and troubleshoot SSIS packages

Lessons

- Debugging an SSIS Package
- Logging SSIS Package Events
- Handling Errors in an SSIS Package

Lab

- Debugging and Troubleshooting an SSIS Package

Module 9: Implementing an Incremental ETL Process

This module describes how to implement an SSIS solution that supports incremental DW loads and changing data.

Lessons

- Introduction to Incremental ETL
- Extracting Modified Data
- Temporal Tables

Lab

- Extracting Modified Data
- Loading Incremental Changes

Module 10: Enforcing Data Quality

This module describes how to implement data cleansing by using Microsoft Data Quality services

Lessons

- Introduction to Data Quality
- Using Data Quality Services to Cleanse Data
- Using Data Quality Services to Match Data

Lab

- Cleansing Data
- De-Duplicating Data

Module 11: Using Master Data Services

This module describes how to implement master data services to enforce data integrity at source

Lessons

- Master Data Services Concepts
- Implementing a Master Data Services Model
- Managing Master Data
- Creating a Master Data Hub

Lab

- Implementing Master Data Services

Module 12: Extending SQL Server Integration Services (SSIS)

This module describes how to extend SSIS with custom scripts and components

Lessons

- Using Custom Components in SSIS
- Using Scripting in SSIS

Lab

- Using Scripts and Custom Components

Module 13: Deploying and Configuring SSIS Packages

This module describes how to deploy and configure SSIS packages

Lessons

- Overview of SSIS Deployment
- Deploying SSIS Projects
- Planning SSIS Package Execution

Lab

- Deploying and Configuring SSIS Packages

Module 14: Consuming Data in a Data Warehouse

This module describes how to debug and troubleshoot SSIS packages

Lessons

- Introduction to Business Intelligence
- Introduction to Reporting
- An Introduction to Data Analysis
- Analyzing Data with Azure SQL Data Warehouse

Lab

- Using Business Intelligence Tools
